

2010 Primary Prevention Supplemental Funding Eligibility Requirements

Supplemental funding is available for window lead abatement. Window lead abatement includes either a jamb liner treatment or vinyl replacement windows. The City of Milwaukee Health Department (MHD) provides \$190 for either option with the owner being responsible for the \$57 permit fee. If the owner chooses vinyl replacement windows, the cost will exceed the \$190 subsidy provided by MHD; the owner is responsible for this additional cost. The owner must choose a contractor from the MHD Certified Lead Abatement Contractor list to complete window abatement. Property owners must address all additional identified lead hazards within 60 days of receiving the owner scope of work from the lead Risk Assessor. This work may be completed by any Certified Lead Abatement Contractor or Wisconsin Certified Lead Safe Renovator. Property owners or building managers can become lead safe renovators by attending the eight hour Wisconsin approved lead safe renovation training prior to addressing those hazards.

All of the following eligibility requirements must be met:

- Property must be located within the above target areas.
- Owner occupants must have children present who are **less than 3** years of age and agree to blood lead tests for all children **less than 6** years of age. (Children not living at the property who visit at least 6 hours per week must obtain parental consent for a blood lead test.)
- Property must have been built prior to 1950.
- Property taxes must be current on all properties.
- Building Inspection orders must be corrected on the enrolled property.
- Single family and duplex properties must be assessed at less than \$150,000.
- Rental units must be available to low-income residents three years following completion of lead hazard control.
- Owner occupants must qualify as low income.
- Windows must have lead hazards documented by MHD staff.
- All windows must have storms (unless replacement windows are being installed).
- In-home childcare centers must receive parental consent to a blood lead test for all children less than 6 years of age.

If you are eligible and interested in participating in the Primary Prevention Program, please complete the accompanying application and mail it to the address indicated on the application. If you have any questions regarding eligibility or lead work training, please contact Richard Gaeta at 414-286-5788 or rgaeta@milwaukee.gov.
